

The map provides an overview of drought and crop conditions as reported through household surveys from 6-15th November 2021. The bar charts provide the percentage reported responses on drought length and crop losses. For example, in Galole 100% of respondents reported drought for over 6 months, and the bar is therefore completely red. The map also shows targeted number of households by sub-county for the planned and ongoing multi-purpose cash program implemented by the ASAL Humanitarian Network since November 2021.
