

Kenya ASAL Humanitarian Network Response - Assessment of Drought Impact - Drought Length

The map provides an overview of drought conditions as reported through household surveys from 6-15th November 2021. The bar charts provide the percentage reported responses on drought length. For example, in Galole 100% of respondents reported drought of over 6 months, the bar is therefore completely red. The map also shows targeted number of households, by sub-county, for the planned and ongoing multi-purpose cash program implemented by the ASAL Humanitarian Network since November 2021.
